

CROPSCAN
AG SOLUTIONS

CropScanAg Solutions Farm Data Manager

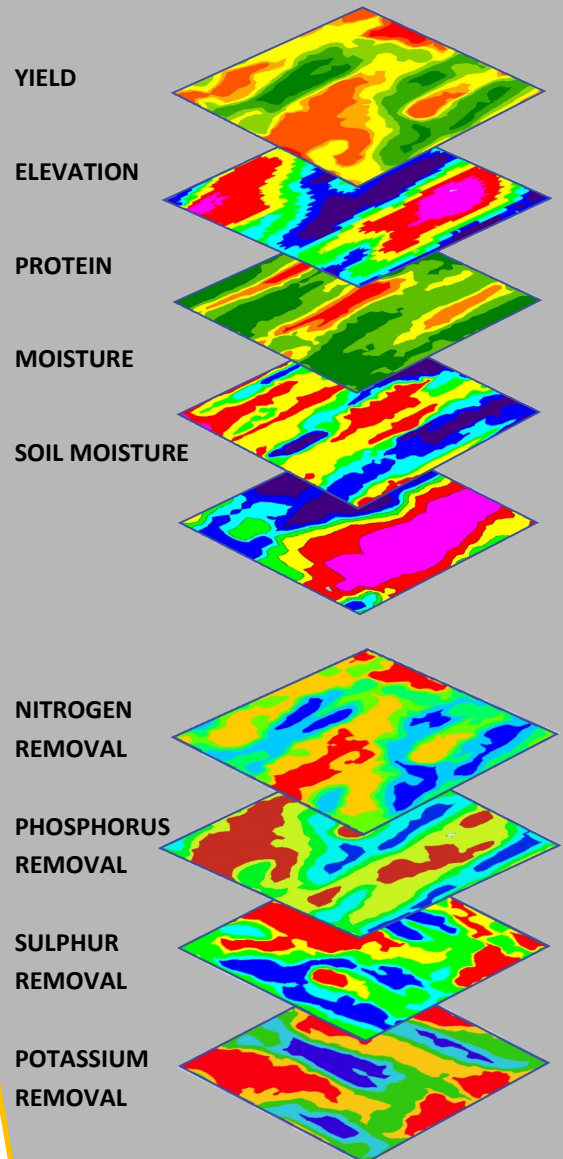

**CropScanAg Farm Data Manager...
a new approach to on farm nutrient
management.**

CropScanAg Solutions offers farmers a means of increasing productivity and profitability by 10-30% through a combination of services;

1. Real-time in field measurements of Protein, Yield and Soil Moisture.
2. Collecting, collating and processing the farm field data and generating a complete set of Field Maps;
 - Protein, Oil, Moisture, Starch Maps
 - Yield Maps
 - Protein/Yield Correlation Quadrant Maps
 - Nitrogen Removal Maps
 - Sulphur Removal Maps
 - Potassium Removal Maps
 - Phosphorous Removal Maps
 - Nitrogen Use Efficiency Maps
 - Water Use Efficiency Maps
3. Creating Variable Rate Fertilization Prescriptions based on real Nitrogen measurements
4. Soil and Moisture Diagnosis and Remediation
