

# CropScanAg Solutions Data Policy

The following document outlines the Data Policy for CropScanAg Solutions Cloud service.

## **1.0 Description:**

CropScanAg Solutions is the operator for the CropScanAg Cloud site (Site). This Site is provided to users of the CropScan 3300H and 3000H On Combine Grain Analysers as a location to collect and store farm field data, i.e. Protein, Moisture, Oil, Starch, Fibre, Yield and GPS coordinates, from these analysers.

These data are generated from the CropScan analysers, the Yield monitor and GPS Transponder installed in the combine.

Users of the CropScan analysers and subscribers to the CropScanAg Solutions Nutrient Management System are provided with a free account to the CropScanAg Cloud site. As well, users are provided with access a Portal for the Site to upload their farm field data to their computer.

## **2.0 Account Holder's Rights to the Data:**

The data collected and stored in the Site is owned by the Account Holder, i.e., the farmer. The Account Holder has the right to share these data with other parties from their computer or tablet.

The Account Holder does not have the right to share access to the site via their account. It is for the Account Holder and CropScanAg Solutions to access and use these data files exclusively.

The Account Holder has the right to cancel this account and thereby to delete the files included on the Site.

## **3.0 CropScanAg Solutions Rights to Data:**

The raw data files belong to the farmer or Account Holder at all times. If CropScanAg Solutions or its' parent company, Next Instruments Pty Ltd, applies their proprietary algorithms to generate new farm field files and maps, then these modified and processed data belong to CropScanAg Solutions.

The Account Holder can subscribe to CropScanAg Solutions Nutrient Management System and thereby have access to these modified and processed files.

Where CropScanAg Solutions has produced the Account Holder's files and maps to produce modified and processed files and maps, then the raw data still belongs exclusively to the Account Holder. CropScanAg Solutions is not able to share these processed and modified files and maps with other parties or sue them for promotional purposes unless permission is obtained from the Account Holder.

#### **4.0 Personal and Property Data:**

All data collected from the CropScan analyser, Yield Monitor and GPS Transponder cannot be sold or provided to a third party without permission of the Account Holder. This includes any data that pertains to the property from which the data was collected. This includes all boundary data, rainfall data, weather data, elevation, soil testing data i.e. EM38 scans, Gamma Radiation Scans, Soil Sample Testing, as well as crop types, seed varieties, fertilizer and chemical usage and type.

Any Personal data pertaining to the Account Holders or their family that may be collected as part of the process of collecting data from the analyser, belongs to the Account Holder and cannot be used, shared, sold or distributed to any third party without permission from the Account Holder.

#### **5.0 Destruction of the Data:**

The Account Holder can upload their data files to their computers, but they cannot delete any data files from the Cloud. The Account Holder can request that all or any files and/or maps be removed and deleted from the Cloud.

All processed or modified files and maps generated for the Account Holder will remain in the Cloud for a period of 5 years after the Account Holder has closed his account. After 5 years, CropScanAg Solutions will have the option to delete all files and maps related to the closed account.

#### **6.0 Revision History:**

Revision 1.0: July 15<sup>th</sup>, 2020

#### **7.0 Company Details:**

Company Name: CropScanAg Solutions  
ABN:  
Address: B1 366 Edgar Street, Condell Park, NSW 2200, Australia
