

N-GAUGE

Grain Logistics App

It's time to  **N-GAUGE** your data

CropScanAg N-GAUGE Grain Logistics App tracks grain transfers from the harvester to the grain buyer. Farmers using the CropScan On Combine Grain Analysers can access the N-GAUGE App to sync virtual grain transfers from the field to farm site storage locations. Farmers can view the quality and quantity attributes of each load of grain from the harvester display to other partners across the farm via a smart device.

The customisable Virtual Grain Storage allow users to:

- Add or delete storage locations
- Transfer grain from one storage location to another
- View current field average for quantity and quality
- View running averages for all in-field and site storage locations
- Split grain transfers across two storage locations
- Simulate grain blending into two or more storage locations
- Create and email site storage reports

N-GAUGE
