**NEXT GENERATION NIR
ON-COMBINE GRAIN ANALYSER**

**INTEGRATED ON
CASE IH COMBINES**

The Tech

Near Infrared Transmission Technology is the world standard when it comes to measuring whole grains.

- New NIR ECU - Linux OS running ISOBUS Virtual Terminal on Pro 700/Pro 700 Plus and Pro 1200 Dual Monitors.
- Measure REAL-TIME Protein, Moisture, Oil, Fibre and Starch for all major crop types.
- 3-4 second scan speed for high density maps.
- CropScan is the only On-Combine Grain Analyser specifically designed for whole grains.

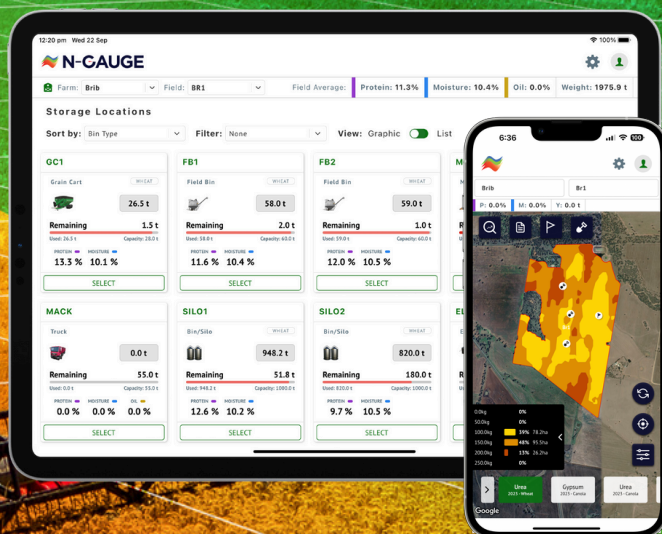

The Benefits

Measuring Nitrogen in the form of grain Protein indicates nutrient availability and uptake leading to improved:

- **Nutrition:** Increase yields by optimising nutrient management with Protein and Yield maps.
- **Efficiency:** Save time and resources with streamlined data collection and analysis.
- **Sustainability:** Minimise your carbon footprint. Maximise Nitrogen efficiency and ensure your fertiliser is where you need it.
